WORLD'S GREATEST

Bocconi University by Grafton Architects scoops World Building of the Year Award

A shambles – Ruadhán MacEoin on Dublin's Decaux deal • In Practice with Deaton Lysaght • Leisure – this month's project focus

Choppinho

Rafael Simoes Miranda was one of the finalists of the "Design de Botequim" competition with the project "Choppinho", produced by Vimoso and exhibited at bar Brazooka in Rio de Janeiro.

Choppinho is a furniture system consisting of four chairs, a table and a side table that together takes the form of a "carioca beer", the chopp caldereta. The idea behind the competition was to create an important element for the main icons of the Carioca's style: the bar furniture.
