In past we have seen quite a few [illusions](#) which really impressed us, and here we have a sofa by [designer](#) Rafael Simoes Miranda which takes these illusions a step further. He has beautifully created this sofa with an interesting theme. Rafael is a member of the ADI (Associazione per il Disegno Industriale) and has won some of the most prestigious design awards. In past, he has worked for about three year with a global conglomerate where he was the head of the design of consumer electronic products such as DVD cameras and others. Though in his beginning years he has completed an internship at Zuccon International Projects, and presently he design watches and jewels for some of the well-known names in the fashion industry. His interest and work includes other areas such as furniture, interior, industrial, electronics and light design.
