## Choppinho

Rafael Simoes Miranda ([www.rsmiranda.com](http://www.rsmiranda.com)) is one of the finalists of the "Design de Botequim" competition, with the project "Choppinho" produced by Vimoso and exhibited at bar Brazooka, in Rio de Janeiro. A furniture system of four chairs a table and a side table, that together takes a form of a "carioca beer" the chopp caldereta.

The competition "Design de Botequim" looks for the ideal furniture to seat, to eat, to drink and to talk with your friends. The idea was to create an extremely important element for the main icons of the Carioca's style: the bar furniture.
